Bra152. Hatfield Peverel Special Roadside Verge (<0.1 ha) TL 806111 to TL 806113

Located on a sharp bend in the road, part of the verge forms a small triangle that is subject to a high degree of disturbance. Nevertheless, several plants grow through areas of broken tarmac and disturbed ground in this unusual habitat. Lesser Calamint (*Clinopodium calamintha*), a nationally rare plant, Common Cudweed (*Filago vulgaris*) and Lady's Bedstraw (*Galium verum*) are found in this dry habitat.

Selection Criteria: SCr13
