Bra60. Patten's Wood (3.4 ha) TL 745314

This possibly ancient wood comprises a high canopy of large Pedunculate Oak (*Quercus robur*) standards, whilst other woody species present include Ash (*Fraxinus excelsior*), Field Maple (*Acer campestre*) and Midland Hawthorn (*Crataegus laevigata*), with an area of planted conifers to the south. The ground flora is typically one of Bramble (*Rubus fruticosus* agg) and Dog's Mercury (*Mercurialis perennis*) with the more open southern part of the wood supporting a richer species mix, which includes Creeping Jenny (*Lysimachia nummularia*) and Three-veined Sandwort (*Moehringia trinervia*).

Selection Criteria: HCr1(b)
