Bra21. Lodge Wood (4.8 ha) TL 693302

This ancient wood comprises Hornbeam (*Carpinus betulus*) coppice and Pedunculate Oak (*Quercus robur*) standards with some Small-leaved Lime (*Tilia cordata*) on the wood margin. The understorey of mainly Hazel (*Corylus avellana*) also includes some Midland Hawthorn (*Crataegus laevigata*). The modest ground flora would be improved by a resumption of coppice management.

Selection Criteria: HCr1(a)
