The radar tracks shown are based on a four-day sample from the 2016 summer period. The tracks are colour-coded according to the height above mean sea level (amsl). Statistics on the numbers of operations relate to fixed-wing aircraft movements for the average 24-hour day, calculated over the 50-day summer period from 16 June to 15 September 2016. The average 24-hour data is calculated based on only departures.
