Hatfield Peverel
Neighbourhood Development Plan 2015-2033

HPNDP Post Submission Further Changes (February 2019)
Foreword

In late 2014 Hatfield Peverel Parish Council (HPPC) embarked on preparing a Neighbourhood Development Plan (NDP) for Hatfield Peverel (HPNDP) and started the process with support from Locality and the Rural Community Council of Essex (RCCE). The Plan presented here reflects the needs and aspirations of residents of the Parish gathered from a series of interactive engagement events, workshops and surveys; organised, collated and written by local volunteers. It gives the community the ability to influence the shape and management of future development in the Parish. Issues raised in the consultation relevant to planning policy at a neighbourhood level have been expressed as statutory planning policies in the Plan. Those issues that the Plan policies cannot directly address have been included in the Non Statutory Planning Community Action Plan, Appendix 2.

The Plan process has given residents a unique opportunity to be involved in meeting the challenges arising from development during the Plan period. Following an independent examination, residents will be asked to support the Plan in a referendum in order for it to be used in determining planning applications within the Parish by Braintree District Council (BDC) and HPPC.

A NDP cannot be used to prevent development but gives an opportunity to identify the best ways to direct local planning towards community wants and needs, while protecting the natural environment and cultural assets, ensuring a more sustainable future for the community. The HPNDP sets out a framework against which all development in the Parish will be assessed.

A glossary and list of abbreviations has been provided at the end of the document in Appendix 3 and 4 to define technical terms used.

While the Plan has been in the drafting stage it has had some weight in planning decisions. The research and evidence gathered has been of value to both residents and Councillors when considering and commenting on planning applications and will continue to be so in the future.

Les Priestley
Parish Councillor, Chair of the Neighbourhood Development Plan Executive Committee
INTRODUCTION

Neighbourhood planning is a right for communities introduced through the Localism Act 2011. There are communities all over the UK that have successfully developed a Neighbourhood Development Plan (NDP) as a tool to influence planning decisions in their area.

“Neighbourhood planning gives communities direct power to develop a shared vision for their neighbourhood and shape the development and growth of their local area. They are able to choose where they want new homes, shops and offices to be built, have their say on what those new buildings should look like and what infrastructure should be provided, and grant planning permission for the new buildings they want to see go ahead.”

In January 2015 Hatfield Peverel Parish Council (HPPC) notified Braintree District Council (BDC) of its intention to produce a NDP. As the Qualifying Body HPPC is responsible for the preparation and monitoring of the Hatfield Peverel Neighbourhood Development Plan (HPNDP/the Plan).

On 30th March 2015 BDC approved the HPPC Parish boundary as the Designated Area (referred to as ‘the Parish’ in the remainder of this document and outlined in red on the map on page 5) for the HPNDP. It is within this area that the Plan and policies will apply. (The black outline areas on the map denote the development boundary as at May 2016).

“The basic conditions that the Plan must meet are that it:
• contributes to the achievement of sustainable development
• takes account of National Policies and Guidance
• is in general conformity with the strategic policies contained in the development plan for the Braintree District
• does not breach and is otherwise compatible with EU obligations.

Once adopted by BDC, the Plan will be a statutory document which forms part of the Braintree District Development Plan for the Parish. It will be used alongside National Policy and BDC’s Local Plan to determine planning applications in the Parish. When the Plan is completed it will provide a framework to manage development in the area for residents, businesses, HPPC, BDC and the development industry.

The HPNDP sits alongside the wider planning context for the area.

A Steering Group was formed open to those who lived, worked and did business in the area. Six sub-groups researched evidence and engaged with the community in order to prepare the Plan:

• Strategy and Coordination
• Environment
• Engagement
• Facilities & Infrastructure
• Economy
• Housing

The Plan must meet a number of Basic Conditions and other statutory requirements set out in Paragraph 8 of Schedule 4B of the Town and Country Planning Act 1990 (as amended). A Basic Conditions Statement accompanies this Plan outlining how it meets these requirements.

"Local and neighbourhood plans should develop robust and comprehensive policies that set out the quality of development that will be expected for the area. Such policies should be based on stated objectives for the future of the area and an understanding and evaluation of its defining characteristics.”

1 Planning Practice Guidance http://planningguidance.planningportal.gov.uk/blog/guidance/neighbourhood-planning/what-is-neighbourhood-planning/
**How the Plan relates to BDC’s Local Plan**

At the time of writing our policies must generally conform to the strategic policies of BDC’s Local Plan which is comprised of the Core Strategy and Saved Policies from the old Local Plan from 2005. BDC is currently preparing a new Local Plan which will be in place until 2033. The HPNDP will reflect this period. BDC’s Emerging Local Plan is anticipated to be adopted in 2018.

BDC’s Core Strategy (2011) refers to Hatfield Peverel as a Key Service Village which will provide housing, jobs and services for the immediate rural areas. In the new Local Plan Hatfield Peverel will be referred to as a ‘Service Village’. Other population centres within the district, including Nounsley, are designated as ‘Villages’.

### Timeline & Milestones

The HPNDP has to undergo several statutory processes outlined in the Neighbourhood Planning Regulations 2012. These include:

- A formal 6-week consultation on the draft Plan (Regulation 14 Consultation)
- A 6-week publicity period on the amended draft Plan following consultation. (Regulation 15 Publicity of HPNDP)
- An Independent Examination
- Community Referendum - 50% approval required
- Plan Made (accepted to inform planning decisions) by BDC

Community Engagement

The production of HPNDP looked to engage with the local community at a very early stage. The Plan has been made reflecting National Policy which highlights that:

“Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area.”

An Engagement Strategy was produced to ensure that the process remained open, transparent and compliant with EU Human Rights requirements. Using work from the Village Plan 2006 Key Community Issues were established with support from RCCE. Demographic data was gathered to monitor that all sections of the Parish had their views taken into account which enabled targeted engagement activities. The Census of 2011 showed the population of Hatfield Peverel to be 4375 with 51% female 49% male which comprised of 1815 households. The average age was 45 (median 47). Full details of the consultation are provided in the accompanying Consultation Statement.

- **A Series of Interactive Workshops** took place between Jan – Sept 2015 with local residents, Junior School, local clubs, Scouts and Guides. Manned displays were at several events including; Election Day, Party in the Park and Essex Dog Day.

- **An Ongoing Internet Presence** was maintained on the Parish Council’s website, Facebook, Twitter and StreetLife, along with regular email updates to the ‘keep me informed groups’ set up on the HPNDP email account.

- **Local Updates** were circulated to every household via the Hatfield Peverel Review.

- **Posters & Flyers** were distributed locally for key events and banners erected to raise awareness of the HPNDP.

- **Public Meetings** were held throughout the process to share the Plan’s progress and discuss key issues.

- **Surveys** including a Housing Needs Study, a Residents Survey and Business Survey were produced.

4Rural Community Profile for Hatfield Peverel (Parish), ACRE OCSI 2013
Key Issues arising from Engagement

- **Housing** - Concern that future development is in the right locations and of the right scale and type for the area
- **Merging with other settlements (coalescence)** - Hatfield Peverel should not merge with Witham, Nounsley or Boreham
- **Design** - Development should blend in with the existing setting
- **Environment** - Special open green spaces and open vistas should be protected to maintain the rural feel of the village in its countryside setting
- **Rocks** - Traffic, particularly on the Maldon Road and The Street is a primary concern
- **Connectivity** - Reduce the need for car use through better broadband, public transport, footpaths and cycle ways
- **Parking** - Improve parking provision in the Parish
- **Facilities** - Enhance community facilities such as the library, school, doctors, village hall, churches, and sports facilities
- **Economy** - Local shops, businesses and pubs should be retained and enhanced

The key issues and evidence were used to establish the Vision and Objectives for the HPNDP and form the foundations for the policies of the Plan. Steering Group Meetings were held for consultation with residents and to provide regular updates on the progress.

The community also raised many important issues which could not be resolved through planning policies. These are included in the Non Statutory Planning Community Action Plan (Appendix 2) which will be taken forward with support from the Parish Council.
VISION AND OBJECTIVES

St. Andrew’s Churchyard

Vision

Hatfield Peverel in 2033 will be a place where people of any age are happy to live with the ability to easily access facilities, education and employment. Sustainability will underpin decisions within the Parish with social, environmental and economic factors all being taken into account.

The rural character and heritage of the village will be maintained and coalescence with the surrounding settlements be prevented by protected open areas. Any new developments in the built environment will be integrated with the landscape and the existing housing.

The village’s geographical position in the area’s road network is likely to continue to be a challenge during the Plan period. Finding creative and collaborative solutions across local authority borders and agencies will be a high priority.

Objectives

1. To build a strong economic and social centre for both Hatfield Peverel and Nounsley, which will provide sustainability for the community

2. To sustain economic growth by enhancing employment opportunities in the Parish; having a thriving retail core and increased options for home working

3. To have effective, superfast broadband and excellent mobile telephone provision for all residents and businesses

4. To continue to be separate distinctive settlements with open green areas maintained between Hatfield Peverel, Nounsley, Witham, Boreham and the wider district

5. To retain the rural character of the village with protected open spaces, enhanced natural environment and recreation facilities for health and wellbeing

6. To have effective communication links with well managed traffic and parking, improved walking and cycling routes and a range of travel options

7. To support access for all residents to appropriate education and health services

8. To ensure the provision of high quality housing suitable for all ages with easy access to essential services where family members can remain living locally
Hatfield Peverel Today

Hatfield Peverel is a semi-rural village in mid Essex, located between Chelmsford, 7 miles to the west, Witham, 2 miles to the east and some 4.5 miles to the northwest of Maldon on the coast. The Parish covers approximately seven square miles, unevenly bisected by the A12 and the railway line running through its northern part from the southwest to the northeast.

The majority of the built area is located to the south of the A12 bounded by the Chelmer valley to the south and the Blackwater valley to the east. There are two centres of population; the village of Hatfield Peverel itself and Nounsley approximately 3/4 of a mile to the south. The landscape is one of gently undulating agricultural land interspersed with small wooded areas and a number of substantial woods.

The local geology includes sand and gravel beds of glacial origin which have been actively extracted. Clay was once dug from 3 brickfields in the Parish. These activities, mostly to the eastern side of the Parish, have resulted in several lakes being established, some of which are used for recreational fishing.

Two rivers flow through the Parish: The Chelmer and the Ter, a small tributary, running roughly north to south to join the Chelmer at Rushes Lock. These waterways are an important green corridor providing ecological networks through the waterways and the species-rich grasses and woodlands which grow alongside them. There is low recorded rainfall in this part of the country but the area beside the rivers has been known to flood in recent time especially the River Ter by The Ford at Nounsley.

The highest point of the Parish is recorded as 157 feet and the lowest about 50 feet above mean sea level. Whilst there are no dramatic geographical features within the Parish, the Braintree District Landscape Character Assessment describes the qualities of the landscape. Further information is also available in the Hatfield Peverel Landscape Character Assessment (October 2015).
Historic Development of Hatfield Peverel

The origins of the village date back to Roman times or earlier originating at the point where the Roman road forded the River Ter. The current A12 follows a similar, if less direct route to the old Roman road which linked Colchester (the Roman capital of Britain) to London. The old road passes directly through the village as “The Street”, the name coming from its Roman connection. A number of older properties, some listed, line this and the other main roads showing how the village has evolved over time (see Historic Features map page 40). Records do point to the establishment of a community in the area shortly after the Norman Conquest in 1066 when a manor was established by Ranulf de Peverel.

The village was largely a self-contained rural economy until the latter part of the 20th century. It had farms, brickfields, orchards, a mill (grain and silk), a forge, bakers, butchers and schools all to support the community and provide employment locally.

As the railway line and station (first opened in 1840’s) were built and roads improved the built up area expanded. It became a popular place for people to stop on journeys between London and Norwich and there were several coaching inns. It became so busy before the A12 bypass was opened in 1974 that in the height of summer it could be difficult to cross the road. The village developed by the end of the 20th century into a largely dormitory area for people commuting to London and other local towns for work.

A community spirit has been retained throughout the changes fostered by churches, the uniformed organisations, the schools, local sports groups, various clubs meeting in the village and events such as the Pram Race, a Carnival, May Day, Party in the Park celebrations.
Overview of HPNDP Policies

The following section includes all the policies of the Plan. Each topic section contains background information arising from the engagement and evidence gathering process. The policies identify: the key issue raised by the community, objectives, the policy, justification and how the policy supports the overall objectives of the Plan.

ECONOMY

Hatfield Peverel contains a range of services used by residents of the surrounding rural area. The Parish looks to Witham as the main town for provision of higher-level services within the Braintree District. Hatfield Peverel’s road connections give access to Chelmsford and Maldon which both provide an alternative range of higher-level services and employment opportunities. 60% of respondents to the Business Survey stated their catchment area was a 10 mile radius.

The local economy shares challenges with the rest of the District including an inadequate road infrastructure, parking and lack of super fast broadband. Comments made at engagement events expressed a desire for more employment in the Parish to include the younger generation and part time opportunities.

Economic activity in the Parish consists of local businesses offering a range of services including vehicle repairs and servicing, leisure, IT development, retailing, environmental control activity, estate agency, dry cleaning, hairdressing and restaurants. Other businesses, mainly trades services operating as sole traders and those offering commercial, administrative and financial services, work from residential properties within the Parish. Retail activity is centred on the two main streets with units rarely becoming available and being filled quickly once vacant.

Take away food outlets and convenience stores including a Co-op Local are well supported reflecting the volume of passing trade generated from the position of The Street at the junction of the main link from Maldon to the A12.

Economy Key Issues

Planning

- Provide a range of employment opportunities, supporting and encouraging local business activity and growth within the Parish in order to continue to service a growing population with adequate parking
- Supply of suitable premises required for new start-up businesses and expansion/development of existing
- Increase opportunities to work from home to reduce commuting by car and increase local employment options
- Enhanced super fast broadband connection will help address the constraints currently experienced by businesses and when working from home
- Retain properties for commercial use including retail services in preference to housing within the Plan Area and increase the range of facilities and services available
- Attention paid to the kerb appeal of the village encourages a more cared for street environment improving the shopping experience and fostering community identity

Non-Planning

- Business premises should be well maintained
- The community needs a hub or centre for people to meet in the daytime. This could be provided by a tea room or similar facility
- Lack of centre for Nounsley once provided by the Sportsman’s Arms
- Advertising and promoting Hatfield Peverel externally to support business
- Improve mobile phone service

---

5 Braintree District Economic Prospectus 2013/2026
HPNDP Post Submission Further Changes
Economic Policy

**Key issue:** Provide a range of employment opportunities, supporting and encouraging local business activity and growth within the Parish in order to continue to service a growing population with adequate parking.

**Objectives:**
- To support employment growth through an increase in the number of active small businesses or expansion of existing ones
- To encourage local working decreasing the need for extended car journeys
- To meet employment needs of local residents
- To maintain the rural nature and small scale mix of business premises in an environmentally sensitive way

### ECN1 Support for Local Businesses

New business uses defined as offices, light industrial units, tourism and hospitality uses and leisure, health and education related activities, and the expansion of existing businesses will be supported throughout the Parish provided that:

- The business employs no more than 20 people on site
- There is no unacceptable impact on residential amenity
- Any new buildings are of a scale and design that respects the landscape character of the area in which it is located
- Any historic, cultural or architectural features are retained or enhanced
- There is an acceptable impact on the local road network including the management of vehicular movements on the surrounding road network to prevent congestion and damage to road surfaces and verges
- Satisfactory access and egress arrangements and vehicular parking and covered, secure cycle parking provision can be made
- Satisfactory arrangements can be made for the containment and disposal of any waste

Proposals for warehousing and storage uses including open air storage will be resisted.

### Justification:

New businesses are encouraged throughout the Parish subject to a number of criteria which seek to ensure that the impact of any new development is acceptable. Expansion of existing business within the same criteria is supported.

The Business Survey indicated that 80% of locally based businesses employed up to 20 people. For this reason, 20 has been taken as the benchmark upper limit when considering small businesses being established in the Parish.

The type, size and volume of vehicle movements associated with warehousing activity is not considered compatible with the capacity of the road network either within the built up area coming from the main A12 trunk route or onward into the wider rural parish. The sizes of associated buildings are difficult to accommodate without a negative impact on rural surroundings and it is an inefficient use of land space compared to the employment generated.

In order to maintain basic employment and business opportunities, reducing the need to commute outside the area, attention should be paid to providing for and improving the retail and commercial services available within the Parish.

---

[Image: Maldon Road]
Objectives:
- To encourage any new housing development to allow for future growth of home working, either as a full time business or infrequently on behalf of an employer
- To decrease the environmental impact of travelling to work through reducing journeys

**ECN2 Working from Home**

Any new or redesigned dwellings should include provision to enable a home office to be accommodated. This could be achieved through the design of the building to allow conversion of roof space or similar area into an office or workspace area or by providing space within the internal layout.

New larger housing schemes should, where appropriate, make provision for work hubs which are readily accessible by foot or by bicycle from new homes and can provide business and social facilities with services for the community.

![Community meeting hosted at Crix](image)

**Justification:**

There has been a significant increase over the last ten years in home working nationally from 2.9 million in 1998 to 4.2 million in 2014⁶. This ranges from more people working from home, perhaps for a day a week for an employer or by basing their business at home. Working from home is generally regarded as a non-planning issue because planning permission is not required in most situations. However, enabling working from home has potential to contribute to the achievement of sustainable development.

It can reduce out-commuting, boost local economies through more use being made of local facilities and enhance individual spending power as a result of lower commuting costs.

Good building design should provide flexibility within the property to enable easy conversion for home working. This widens the employment choices for individuals.

A work hub is a flexible workspace offering professional facilities for micro businesses and mobile workers, including those who work from home. A work hub serves more businesses than a traditional office can house. Shared facilities may include bookable ‘hot’ desks, formal and informal meeting spaces, super fast broadband and costly professional equipment. Work hubs offer an important, professional front for small and start up enterprises. These provide the ability to meet clients, receive business advice and support and have friendly professional staff handling their phone calls and post. They provide a relaxed working environment helping collaboration and the exchange of ideas and are an antidote to isolation.

Work hubs should be provided on any sites allocated by BDC in the Parish. Where not viable developer contributions towards work hubs provision should be considered in line with policy FI5.

⁶Office of National Statistics
**Economic Policy**

**Key issue:** Enhanced super fast broadband connection will help address the constraints currently experienced by businesses and when working from home.

**Objectives:**
- To maximise the ability of business to operate competitively while based outside a main town environment
- To improve the quality of life for residents through better connectivity enabling social interaction and inclusion beyond the immediate area

**ECN3 Broadband and Mobile Connectivity**

The development of new, superfast broadband and mobile infrastructure to serve the Parish will be supported. Proposals for new development must demonstrate how they will contribute to, and be compatible with, superfast broadband and high quality internet connectivity. This could be through a ‘connectivity statement’ accompanying a planning application. Such statements should consider land use, the anticipated connectivity requirements, their speed, and known data networks, including a realistic assessment of connection potential or need to contribute to any such networks.

Where no internet provider is available, as a minimum (subject to viability), suitable ducting that can accept superfast broadband should be provided to the public highway, a community led local access network or another suitable location.

Where possible additional ducting should be provided that contributes to a local access network for the wider community. The costs associated with this can be considered alongside any other requirements and be subject to viability testing.

**Justification:**

Superfast broadband and better mobile connectivity can make a significant difference to those living and working in villages and rural areas. Both the Resident and Business Surveys confirmed that broadband speed in the Parish is slow.

In line with Broadband Delivery UK, part of the Department for Culture, Media and Sport, the Government is keen to see improvements to broadband and mobile infrastructure. The NPPF supports high quality communications infrastructure. It specifically states that the development of superfast broadband technology and other communication networks plays a vital role in enhancing the provision of local community facilities and services. BDC also recognises these benefits. Cabinets and Poles should be sited in accordance with the Cabinet Siting and Pole Siting Code of Practice.

ECC recommends that broadband installation should be provided for all new developments without a distinction between small and large scale development.

The policy requires developers have early regard to the connectivity of their proposals.

![Broadband Box, Stonepath Drive](image-url)
Economic Policy

Key issue: Retain properties for commercial use in preference to housing within the Plan Area and increase the range of facilities and services available.

Objectives:

- To recognise three commercial zones within Hatfield Peverel built area (see map page 19) along The Street and Maldon Road
- To avoid a loss of business and retail premises in these zones
- To provide a good level of services for a growing community and decrease the need for car journeys
- To protect new commercial developments from future change of use through Permitted Development throughout the Parish

Justification:

In order to provide local shopping and services for the community positive action is required to protect and enhance commercial premises. This contributes to reduced car journeys, providing local employment and training opportunities.

In addition to the two Local Centres identified by BDC the Plan identifies three commercial zones. The zone along Maldon Road incorporates existing retail premises, the Village Hall and Community Association which runs a bar and the former Salvation Army Hall which includes office facilities and parking. The two zones along The Street incorporate the BDC local centres and expands them to include neighbouring commercial premises. These zones would be best placed for economic rather than housing growth.

The Regulation 14 draft of HPNDP identified the former Arla site as suitable for mixed use development. 87% of respondents agreed with the policy.

Commercial activity such as local shopping tends to be concentrated along the main thoroughfares making it easier to access a variety of businesses conveniently. Suitable commercial premises are limited and their loss would tend to decrease the accessibility and attractiveness of services and trades offered. Residents have stated that they would like to see Hatfield Peverel develop more speciality shopping units as in the past it included a butchers, bakers, greengrocers, haberdashers etc. A number of these former businesses are now converted for residential use. The community would also welcome a café/tea room.

It is important to maintain a varied selection of commercial premises in the wider Parish to support diversity, local employment and prosperity.
Economic Policy

Key issue: Attention paid to the kerb appeal of the village encourages a more cared for street environment improving the shopping experience and fostering community identity.

Objectives:
- To create an appealing environment that people wish to work, shop and stay in
- To create meeting places
- To encourage residents and businesses to have a pride in the community

Justification:
The streetscape gives visitors their first impression of the village. Residents have said that they feel this now lacks cohesion and continuity and could be improved. An appealing streetscape encourages people to use the businesses and facilities available. To achieve this there needs to be a more co-ordinated approach. Individual planning applications need to be assessed in the context of the wider public realm, this will include increasing parking space, providing community services, improving signage and visual appeal of the street scene.

Improving the appeal of the area will encourage use of the businesses not just in the commercial zones but also in the wider local area. The community supports improvements to Hadfelda Square as outlined by the BDC Open Space Action Plan (2016)

There has been ongoing discussion around the provision of a Maldon Link road bypassing the village. Residents have said they are in favour of this. This and any road improvement that significantly reduces traffic flow would give the opportunity to enhance public realm provided improvements meet the requirements of ECC and Highways Agency.

ECN5 Public Realm

Businesses will be expected to consider the visual impact they make on the area and to take every opportunity to enhance it through reference to guidance such as the Essex Design Guide and the Hatfield Peverel and Nounsley Character Assessment or other relevant guidance as it becomes available.

This will include elements of the streetscape such as well-designed street furniture and signage, lighting, landscaping, and open spaces. The purpose of any enhancements would be to improve conditions for pedestrians and cyclists moving around the village and help to create focal points for business activity and community interaction.

Development (including a bypass) should include provision of sensitive enhancements to the Public Realm along existing roads where appropriate such as: widening of pavements, improved surfacing, tree planting, improved crossing points, traffic calming and the creation of areas of shared surface.

Hadfelda Square
ENVIRONMENT

A major attraction of the Parish is its rural location while being close to the road and rail networks, open spaces, countryside views and well established network of paths contributing to the overall appeal (see Map Environment and Parish Features page 22). It is this character that the community want to retain when considering any developments. A separate document, the Hatfield Peverel Landscape Character Assessment (2015) commissioned by the Parish Council identifies areas of particular significance and describes the environment of the Parish. New building outside development boundaries should be appropriate to the countryside to protect and enhance the landscape character and biodiversity, geodiversity and amenity of the countryside.

At it’s southern boundary the village of Hatfield Peverel is separated from Nounsley by a strip of fields. The community wishes to keep this degree of separation. The growth of the town of Witham to the east, also causes concern. The community wish to retain the separate identities and distinctiveness of the settlements.

There are three Protected Lanes in the area; Sportsmans Lane (BTELANE2), Bumfords Lane (BTELANE1) and Terling Hall Road (BTELANE3). Sportsmans Lane was re assessed in 2012 and the protected lane designation was extended along its entire length which increased its archaeological potential. There are no specific bridleways.

Open spaces are enjoyed by the community who wish to see them retained for amenity and outdoor pursuits. Opportunities will be sought to expand or improve the sites. BDC’s Open Spaces Action Plan (2016) identifies areas in the parish that it will support when funding becomes available through Section 106 contributions.

Open views and sites used for recreation that have been identified by the residents as being important will be protected and supported for future amenity and recreational use.
Environment Key Issues

Planning

- Prevent the encroachment of the nearest town, Witham and the merging of Hatfield Peverel and Nounsley to protect the uniqueness and separation of these settlements
- Preserve and enhance natural habitats
- The community consider a number of views to be important. In preserving the rural landscape setting of the village
- Protect and expand recreation facilities and spaces for community well-being
- The allotments are an important amenity to the Parish as they provide green space and opportunity for health and wellbeing
- The footpaths in the Parish are important for access, health and recreation and have been established over a long period
- The introduction of bridleways could provide more off road routes for horse riders and cyclists
- Concern about development on areas prone to flooding. Storm water management areas to be used to enhance the area and encourage wildlife
- Hatfield Peverel has a long history and its links to that heritage should be protected whilst allowing the Parish to move forward

Non-Planning

- Waterways in the Parish are underutilised as an amenity and recreation facility especially for the younger generation. It is also important they are well maintained
Environment Policy

**Key issue:** Prevent the encroachment of the nearest town, Witham and the merging of Hatfield Peverel and Nounsley to protect the uniqueness and separation of these settlements.

**Objectives:**

- To prevent coalescence between Hatfield Peverel and Nounsley
- To prevent coalescence between Hatfield Peverel and Witham
- To ensure that any new developments maintain the rural nature of both settlements of Hatfield Peverel and Nounsley by maintaining green wedges

### HPE1 Prevention of Coalescence

A green wedge will be created along the eastern development boundary of Hatfield Peverel and at the eastern boundary of the Parish with Woodend Farm to avoid coalescence with Witham. (See map page 25)

A similar green wedge will be created that will preserve the open space between the built area of Hatfield Peverel and the hamlet of Nounsley.

In these areas the following development will be permitted provided it maintains the open nature of the area.

- Agricultural purposes
- Outdoor recreation and sports facilities
- Cemeteries
- Replacement of existing building
- Redevelopment of previously developed land
- Transport infrastructure
- Utilities (e.g. power, water, gas, sewage)
- Developments brought forward under a Community Right to Build Order

**Justification:**

Strong support has been given to the retention of a green wedge in order to prevent coalescence between built up settlements within the Parish and adjoining authorities.

A high level of concern was expressed in the engagement activity that Witham and Hatfield Peverel will merge with one another. There are already well developed plans to extend Witham on the western side as part of BDC’s Strategic Growth Area. If there is development on the eastern side of the village boundary south of the A12 this starts to erode the gap between the two settlements where the open farmland landscape contributes to a sense of separation between Hatfield Peverel and Witham which are just 1.8km apart. North of the A12, inserting a green wedge to the east of The Vineyards preserves the sense of an empty landscape which prevails across the swathe of farmland between the rail and road corridors, characterised by the same elevation, scale and rectangular arrangement. A similar green wedge at the eastern end of this farmland will also prevent coalescence. This area is part of landscape area 4 and the southern part of landscape area 3 in the Hatfield Peverel Landscape Character Assessment. The landscape guidelines identify these areas as “contributing to the sense of separation between Hatfield Peverel and Witham”.

Three quarters of the respondents to the engagement exercise stated that it was either very important, or important that the gap between Hatfield Peverel and Nounsley be maintained. There was a strong feeling that the open countryside be kept so that there was a clear delineation between them. This area forms part of landscape area 6 in the Hatfield Peverel Landscape Character Assessment (2015) which states “the open farmland should be retained to maintain the sense of separation between village and hamlet and preventing the coalescence of the two.”

It is recognised that some areas of land within the green wedges are working countryside and that other types of development often found and suited to the countryside could be permitted within these areas without significant harm to the overarching objective of ensuring that the separate and individual identities of Hatfield Peverel, Nounsley and Witham are retained. To this end, the policy flexibly identifies certain types of development to ensure that the rural economy can continue to function and be viable.
Map showing Prevention of Coalescence Areas
**Environment Policy**

**Key issue:** Preserve and enhance natural habitats.

**Objectives:**
- To protect and enhance biodiversity
- To protect wildlife through safeguarding and enhancement of green corridors

---

**HPE2 Natural Environment & Biodiversity**

Development should retain and enhance existing trees, hedgerows and habitats which are important for their historic, visual or biodiversity value unless the need for, and the benefits of the development in that location clearly outweigh any loss. Any such loss will be appropriately mitigated.

Strong support will be given to the retention of natural boundary treatments and the provision of new areas of natural planting and habitat as part of new developments. This will help to promote wildlife corridors and, where appropriate, provide natural screening to help integrate development with existing built-up areas.

Development should also:
- Restrict planting on a development to locally native species
- Protect the best and most versatile agricultural land
- Have regard to and respect the character of the landscape and its sensitivity to change
- Enhance the locally distinctive character of the landscape in accordance with the Hatfield Peverel Landscape Character Assessment (2015)
- Take account of the potential impacts of climate change and ensure the protection and enhancement of the natural environment, habitats, biodiversity and geo-diversity of the Parish

---

◊ Proposals to develop a network of wildlife corridors alongside public rights of way will be supported
◊ Where revisions to existing rights of way are necessary to accommodate planned development alternative routes should avoid the use of estate roads for the purpose wherever possible. Proposals that include appropriately designed and surfaced footpaths through landscaped and open areas will be supported

**Justification:**

The countryside is rich in natural flora and fauna. The Hatfield Peverel Landscape Character Assessment 2015 (HPLCA) has identified a number of key local characteristics to be protected and enhanced including:
- ancient or species-rich hedgerows
- ancient trees or trees of arboriculture value

Mitigation measures should enable the preservation, restoration and recreation of wildlife habitats, and the protection and recovery of priority species.

There are three lanes, Terling Hall Road, Bumfords Lane, and Sportsmans Lane which have met the threshold for Protected Lane status.

Residents have commented on the varied wildlife within the Parish. This includes feral peacocks in Nounsley, deer, buzzards, kites, hedgehogs, bats etc. In a study on the Stonepath Meadow Site (2000 - 2016) 107 faunal species were identified including various rare and some endangered species. Several of the birds are on the RSPB red list.
Environment Policy

Key issue: The community has identified open spaces that it values. Some of these need protecting from development into the future.

Objective:
- To protect and improve identified green spaces to ensure their existence in perpetuity for the benefit of the community and visitors

HPE3 Protection of Local Green Space

Proposals for development which would result in the loss of the identified Local Green Spaces within this plan will not be permitted.

The identified areas are:
- The Green
- The Duck Pond

Justification:
Designated Local Green Spaces (LGS) have special significance for the Parish.

The NPPF (Paras 76 to 78) clearly sets out the criteria for designation of a Local Green Space.

“Local Green Space, which cannot be a large swathe of land, must be of particular importance and in reasonably close proximity to the local community and will be protected from development except under very special circumstances.”

Continued on next page.

OS Co-ordinates: Easting (x)579469  
Northing (y)211409 | A small, tranquil, wildlife friendly area with a potential for enhancing its benefit to the community. Visiting the ducks has been an enjoyable pastime for families for years. | Has potential as a focus for community based projects, clearing and maintaining the area, pond dipping etc. |
Environment Policy

**Key issue:** The community values the Strutt Memorial Ground (the Rec) as an open space and wishes it be protected but to allow for projects that enhance the leisure use/experience of the area to be possible in the future.

**Objectives:**
- To maintain and improve Strutt Memorial Ground for the benefit of the Parish in perpetuity
- To allow for limited buildings to be erected e.g. toilets; changing facilities that will enhance the use of the area for the community

**HPE4  Strutt Memorial Recreation Ground**

No building will be allowed on the Strutt Memorial Recreation Ground (the Rec) unless it is to provide for clearly identified and evidenced needs directly associated with recreational use.

**Justification:**

The Strutt Memorial Recreation Ground acts as a “green lung” within the village. It is used extensively for recreational purposes by the community including children and families, joggers and dog walkers providing a safe area in the heart of the village.

As it is located next to the Village Hall and is a large area within the centre of the village it is an ideal place for events. It is hoped that in the future more use can be made of this area. It can be both tranquil and vibrant at different times.

The Strutt Memorial Ground is owned by HPPC covenanted for use as a public open space and recreation ground in lasting memorial to Edward Gerald Strutt. Uses include facilities for exercise, recreation and social activities. The engagement activities identified the need for toilets and an outside gym. Changing facilities would also be acceptable.

OS Co-ordinates: Easting (x) 579581 Northing (y) 211502
Environment Policy

Key issue: Protect and expand recreation facilities and spaces for community wellbeing.

Objectives:
- To maintain, improve and develop recreation and sports facilities to meet the diverse recreational needs of an expanding population
- To protect green, open spaces not covered by the LGS designation
- To maintain/increase the network of footpaths, cycle paths and bridleways

HPE5 Sport and Recreation Provision

Proposals for development which would result in the loss of any recreational facilities will be permitted only in circumstances where a replacement facility of equal or enhanced quality will be provided.

The provision of additional sports and recreation facilities will be encouraged in appropriate locations.

Support will be given to proposals that improve and extend the existing footpath network and create a cycle path and bridleway network, allowing greater access to housing, village centres, green spaces and the open countryside.

The loss of existing footpaths and cycle paths will be resisted.

The current allotment sites will be protected.

The Dannatt’s quarry site will be protected for recreation use.

Justification:
The community feels that although there are some good facilities, in particular those identified by BDC and shown on the map of Green Areas and Recreation on page 31. These could be expanded and improved to meet the recreation, health and wellbeing needs of the community in the future. Facilities identified as needed were an outdoor gym, tennis courts, changing facilities and investigating greater use of waterways for recreational purposes.

In addition, HPPC are hoping to secure the old Dannatt’s quarry site on Wickham Bishops Road to be run by a Community Interest Company (CIC) as a Community Park. Improved footpath access to this and the Keith Bigden Memorial Ground on Wickham Bishops Road is necessary.

Various footpaths that lead to the surrounding countryside are highly valued and used frequently by residents. When asked to rank the importance of the different open spaces, the local footpaths came third highest. ECC has stated that they consider the footpaths to be protected.

The open spaces and associated recreation facilities within the Parish contribute to physical and mental health. It is important for overall wellbeing to maintain areas for both exercise and peaceful relaxation. They also enhance a sense of belonging for individuals.

Allotments fulfil both the above criteria as well as providing home grown produce and an enhanced area for nature.

It is important to maintain these spaces to meet the diverse recreational needs of an expanding population as well as enhance the biodiversity and rural character of the village.

Former Dannatt’s quarry, (proposed Community Park)
Environment Policy

**Key issue:** The community consider a number of views to be important in preserving the rural landscape setting of the village.

**Objectives:**
- To preserve the rural character setting of the village
- To protect views and open spaces that are valued by the community and form part of the landscape character

**HPE6 Protection of Landscape Setting**

The Plan seeks to protect the landscape setting of the village through preservation and enhancement of views identified by the community (see pages 33-37) and the Hatfield Peverel Landscape Character Assessment (2015).

Any proposed development, or alterations to an area within these views, must ensure their key features can continue to be enjoyed including distant buildings, areas of landscape and open agricultural countryside.

**Justification:**

The engagement process highlighted a desire to protect the rural landscape setting of the built area of the Parish. The Residents Survey asked which views best demonstrated this feature. A photographic competition allowed residents to identify and vote on views taken of the Parish, and a village walkabout helped identify special views for inclusion in this policy along with photographs taken by residents.

The views south and west towards Danbury were noted as being the most aesthetically pleasing. Residents also felt that views to the north and east were important in accentuating the rural feel of the outer Parish around the built areas and that erosion of these by development within the Parish or from neighbouring settlements could threaten the landscape setting in those areas.

The Hatfield Peverel Landscape Character Assessment (2015) identified many views across the Parish. The most important of these have been identified for protection and are identified on the map on page 33.

The HPLCA (2015) states that:

“the existing views in the valley landscape around the southern fringes of the village are framed by blocks of woodland and hedges associated with the valley slopes and the stream corridor itself. Baddow Ridge is occasionally glimpsed in views from the valley slopes in the north of the character area, while the impression of Hatfield Peverel in views from the south is limited to glimpses of properties nestling within a framework of mature vegetation in the vicinity of Church Road and Sportsman’s Lane. The location, characteristics and visual qualities of these views should be retained and enhanced to ensure the setting of the southern fringes of the village”

It echoed support for the views looking east from the village by stating:

“the broad open views across arable farmland on the gently falling valley slopes, in which occasional glimpses towards the steep ridge at Wickham Bishops are possible, are to be safeguarded. The stands of trees that fringe the fishing lakes/reservoirs within the open farmland landscape, punctuating these views, should be retained and enhanced through management and new planting with species characteristic of the valley landscape of the River Blackwater”.

It also makes reference to the views from outer areas of the Parish towards the built up area as having a significance which could be affected by development.

Not all the features identified by the community require protecting or will be subject to development e.g. the Ford, outlying areas and river scenes. Although not included in the Plan these are important and recorded in the evidence base.

Objectives:

- To maintain awareness of areas liable to flooding and avoid the risks involved in building there
- To ensure that Sustainable Drainage Systems (SuDS) are used to improve the area accompanying development
- To direct development to the lowest areas of flood risk using sequential and exceptions tests and using a risk based approach to ensure development does not exacerbate flooding

Justification:

There are two rivers that run through the Parish, the Ter and the Chelmer. Both are prone to breaching their banks.

All development proposals need to take account of the potential impacts of climate change and ensure the protection and enhancement of the natural environment, habitats, biodiversity and geo-diversity of the district.

The map Environment and Parish Features on page 22 shows the areas in danger of being flooded at the time this document was produced. Advice should be sought on the most recent assessment of risk from the Environment Agency. Please refer to www.maps.environmentagency.gov.uk for up to date information.

BDC will minimise exposure of people and property to the risks of flooding by following the national guidance laid out in NPPF/Planning Practice Guidance (PPG) together with advice from ECC as Lead Local Flood Authority.

A sustainable drainage system (SuDS) is designed to reduce the potential impact of new and existing developments with respect to surface water drainage discharges. It should be used wherever possible to reduce problems with increased flash flooding after sudden rain, promote groundwater recharge, enhance biodiversity and provide amenity benefit, unless, following an adequate assessment, soil conditions and/or engineering feasibility dictate otherwise.
Environment Policy

**Key issue:** Hatfield Peverel has a long history and its links to that heritage should be protected whilst allowing the Parish to move forward.

**Objectives:**
- To conserve heritage assets of significance
- To identify areas, features and buildings which contribute to the character of the Parish and need conservation

**HPE8 Heritage**

Any development will enable the conservation and sustainability of the historic environment to maximise the wider social, cultural, economic and environmental benefits such conservation can bring while developing opportunities to draw on the contribution made by the historic environment to the local character and distinctiveness.

An appropriate assessment of the significance of any heritage asset(s) in the Parish, including the contribution made by their setting, the impact of a development on the asset(s) and how such development could conserve and enhance the asset(s) will need to be included in any planning application that effects the asset(s) using information from the Essex Historic Environment Record, guidance from relevant experts and where appropriate using the Building in Context Toolkit (Historic England).

Developers will be expected to respect these areas and buildings, whatever their state of repair, and to ensure no harm comes to them as a result of their plans. This will include the setting of the asset.

The Parish will be open and receptive to innovative but sensitive uses of a heritage asset in order to support its conservation, enhancement and future use.

**Justification:**

All heritage assets both designated and non-designated are held in high regard by the Parish and subject to this policy. The NPPF describes heritage assets as: “a building, monument, site, place, area or landscape identified as having a degree of significance meriting consideration in planning decisions, because of its heritage interest” and requires that there should be a positive strategy for the conservation and enjoyment of the historic environment.

There are a number of non-designated heritage assets with archaeological interest throughout the Parish as identified on the Essex Historic Environment Record and illustrated on the map on page 40. Developers may be required to submit an archaeological desk-based assessment and to conduct an archaeological evaluation to inform their planning applications. Other heritage assets are documented in the BDC publication - Braintree District Historic Environment Characterisation Project 2010. A local list of heritage assets for the Parish is being produced in line with guidance from Historic England. There are a number of Tree Preservation Orders (TPOs) in the Parish and the community need to identify significant trees that should be considered for further orders to protect the rural identity of the Parish.

Information about the significance of the historic environment of the Parish that is secured through the planning process should be made publicly available by developers. English Heritage and CABE’s ‘Building in Context Toolkit’ provides information on heritage and design issues to stimulate a high standard of design when development takes place in historically sensitive areas.

It can be prohibitively expensive to maintain and restore heritage assets. Creative uses to make them self-sustaining (e.g. café/tea room, parkland/buildings for events or ceremonies; boutique shops; gardens etc.) will be supported where it can be demonstrated that no harm will come to the asset. These solutions will stop any loss of significance, and secure the positive contribution that conservation of heritage assets can make to the Parish.

Facilities and Infrastructure

Facilities and infrastructure enhancements benefit all sections of the community and are of most concern to the residents. Many of these issues cannot be addressed directly by the policies within the Plan but constrain sustainable growth.

The most significant transport links for the Parish are provided by the A12 trunk road and the London-Norwich railway line which has a station at Hatfield Peverel. These links give direct access to Chelmsford and onwards to London in one direction and towards Colchester, Ipswich, Norfolk and the coast in the other (see map showing location of Hatfield Peverel and Road network page 42).

The railway station is both an economic and social asset. A significant percentage of the village commute by train (17.7% Hatfield Peverel commuters travel over 40Km to work compared to 11.1% for Essex and 4.9% for England). Bus routes serve the Parish with links to Chelmsford, Witham, Colchester and Maldon, providing transport for commuters, school children and the elderly. Local taxi firms also provide a service to residents and a taxi bus service can be booked. For the community to remain sustainable easy access to various modes of transport is required.

Hatfield Peverel currently provides access to the A12 to and from Maldon District. The Parish has experienced an increased volume in traffic flow over the last few years as evidenced by ECC highway surveys and counts. Hatfield Peverel is designated by ECC /Highways England as an emergency route when there is a closure of the A12. The government announced a proposal to widen the A12 from Boreham to Marks Tey. The provision of a spur between Junctions 20b and 21 would provide for a Maldon Link road bypassing Hatfield Peverel. Improvements to the A12 and the creation of a bypass are considered by residents as important to mitigate traffic problems.

There is a perception of speeding within the Parish. Hatfield Peverel has an active Speedwatch group, which operates a Police approved speed camera, together with four Speed Indicator Devices (SIDs) which record passing car speeds and has resulted in further action being taken.

In addition to being a thoroughfare Hatfield Peverel also has parking problems. Restricted parking on a number of streets, and double yellow lines near junctions, the school and other areas has partially addressed some of the issues. Pavement parking is a problem on Maldon Road and The Street. Hadfelda Square car park is the only public parking area in the village centre and is currently limited to 2 hours free parking.

7 Distance Traveled to Work (Census 2001, UV35), Travel to Employment Centres Department of Transport 2011
The Parish is proud of its education provision. There are currently 2 day nurseries that provide after school clubs. Neither of them at present provide care for under 2 year olds. Hatfield Peverel Infant School (4-7 yrs.) and St Andrew’s C of E Junior School (7-11 yrs) are near capacity and the current sites do not allow for expansion. There is no secondary school within the Parish. Pupils either use public transport, provided buses or private transport to access their allocated or chosen school. Education should not just be considered for the young and the Parish supports adult education provision.

Hatfield Peverel Sidney House Surgery and its partner surgery, The Laurels, in nearby Boreham provide Primary Care services for both villages and the wider area. The surgery has a dispensary which offers a service for residents outside a one-mile radius. Those inside the one-mile radius are able to use the nearby pharmacy in Hadfelda Square. There is a NHS dental practice, which has capacity for new patients and no optician in the Parish. Secondary Care is provided at Broomfield Hospital, Chelmsford. A ‘Dial a Ride’ service and the Chelmer Valley Park and Ride provide transport links to the hospital. The Parish has an ageing population and growth following development will increase demands on already stretched health care provision. It is very important to the community that these local facilities are protected and enhanced.

Other facilities and organisations in Hatfield Peverel help to create a strong community, for details see Appendix 1. HPPC owns a number of facilities which are held in perpetuity for the benefit of the community. The provision of a vibrant core to the village and the retention of open spaces for recreation help to mitigate the negative effects of isolation (including mental health issues) experienced by all sections of the population. A Map of Hatfield Peverel Amenities can be found on page 44.

Key Issues

Planning

• The impact of traffic including vehicle size, volume and speed on the movement of Parish residents is a cause of concern
• Improvements to footpath, cycling and public transport opportunities to access employment, amenities and recreation in order to reduce over-reliance on private cars
• The railway station must be a long term feature of the Parish and the provision of a frequent and reliable service should be a priority
• The layout of the main roads through the village has developed from old street patterns with housing very close to the road which reduces pavement width in places, increasing risks to pedestrians and property and restricts expansion
• Commuter parking on residential streets, parking to access healthcare care facilities, and general lack of availability of parking is of concern
• The Parish does not currently have a public electric vehicle charging point
• Provision of local schools, nurseries, surgery and pharmacy in the village is important. Impact of new development will affect their ability to cope
• Lifelong learning opportunities are encouraged within the Parish
• A site has been identified for a new Primary School as part of strategic development at Lodge Farm, Witham. The route to the proposed school is alongside the A12 trunk road and is unguarded. School journeys would therefore be likely to involve driving and parking would be an issue
• Hatfield Peverel lies very close to Witham south which is already experiencing significant housing growth. The GP surgery boundary encompasses this area of growth and is at capacity
• The GP surgery was extended in 1994, but due to site limitations cannot be further extended
• Both Hatfield Peverel and Nounsley need to have flexible centres (hubs) to foster social interaction and cater for a wide range of people including a tea room/café, meeting place, events venue and enhanced facilities at the Village Hall
• Concern about the loss of local assets and amenities and the benefits of retaining these for community use (e.g. Sportsman’s Arms)
• More sports facilities are needed e.g. outdoor gym
• Many of the issues raised by the community are important and can be resolved through the use of developer contributions, financial or direct provision

Non-Planning

• Motorists do not observe the speed limits and fail to stop at the zebra and school crossings
• The slip road on to the A12 towards Witham is hazardous because of the road layout and speed of traffic
• High level of noise from the A12 could increase with the proposed 3-lane improvements
• HGV movements cause traffic problems, congestion, road damage due to the size of the vehicles and air pollution
• The current car parking facility at the railway station is considered too expensive and consequently this leads to increased on road parking in some local residential streets
• The bus services are inadequate to meet the needs of the community, especially the more rural areas. There is no bus service running in tandem with the railway timetable
• A considerable number of children in the Infant and Junior Schools are from outside the village
• Parking in the vicinity of the school is a problem. There is only limited on-site parking for staff members

• Travel out of the area to secondary schools is by car, bus or train. Public transport costs are of concern

• Expansion of neighbouring towns and villages may impact on Hatfield Peverel children when they come to apply for secondary places because the Parish is not in a priority school catchment

• NHS funding reduction is an issue for the GPs and the staffing levels needed to support the surgery services required in this community

• The existing GP surgery will struggle to cater for any further population growth as the patient list is now operating at full capacity. The closure of a GP walk-in service in nearby Springfield has exacerbated the situation

• There can be a long wait for an appointment with a specific doctor due to the way the surgery operates its appointment system

• Residents of Nounsley using public transport to access the village GP surgery or neighbouring towns for the opticians are limited to a bus service operating every two hours

• The Village Hall is an important facility that needs on-going investment and community support. Its use should be reviewed and creative ideas for future development to ensure sustainability e.g. relocating the library, café/ tea room, public toilets

• The Sportsmans Arms, Nounsley, has historically been a valuable resource and has been protected as an Asset of Community Value. This could be an important hub and community centre for the future which would have to be replaced with an alternate site if proposed for residential development

• There are a large number of cyclists in the village and it would be good to encourage a club/group to form

• The village would benefit from having a public toilet especially near the Rec
Facilities and Infrastructure Policy

**Key issues:** The impact of traffic including vehicle size, volume and speed on the movement of Parish residents is a cause of concern. Improvements to footpath, cycling and public transport opportunities to access employment, amenities and recreation in order to reduce over-reliance on private cars.

**Objectives:**
- To support, promote and encourage alternative travel options
- To encourage more sustainable modes of transport, by improved connectivity, providing links to public transport and better walk and cycle infrastructure (including safe storage)
- To ensure that routes to schools are safe for families
- To reduce traffic and parking issues
- To ensure streets are designed to be places rather than just corridors for traffic
- To manage and mitigate adverse effects of development on the roads of the Parish

**FI1 Transport and Access**

Development proposals must be supported by a Transport Statement or Assessment which must reference ECC Development Management Policies (2011), and in particular Policy DM13, which specifies the thresholds (Appendix B) when such statements will be required.

Proposals for all new developments should prevent unacceptable risks from emissions and all forms of pollution (including air, water and noise pollution) to ensure no deterioration of current standards. All applications for development where the existence of/or potential for the creation of pollution is suspected must be supported by relevant assessments.

New development must provide appropriate safe pedestrian and cycle routes to public transport hubs e.g. bus stops and the railway station and recreational, educational and retail facilities. Where possible these routes should link to other local and national networks. Safe links from Maldon Road to Keith Bigden Memorial Ground and Bury Lane to the station are required.

Access for all should be the standard. Where possible, shared use cycle ways/footpaths should be provided. The needs of those with mobility problems and visual impairment should be considered e.g. dropped kerbs, textured surfaces. This will also meet the needs of people with pushchairs.

Developments will be required to implement ‘shared spaces’ or ‘living streets’ to reduce both the speed and dominance of motorised transport, by removing unnecessary street furniture/road markings, introducing specific materials and a speed limit of 20 mph. Church Road from The Street to De Vere Close and New Road are seen as suitting shared spaces.

Any new public parking areas should provide secure covered cycle bays or storage. Increased secure cycle parking will be provided at local amenities e.g. school and station to meet demand, encouraging residents to use cycles instead of cars.
Facilities and Infrastructure Policy

Justification:
Traffic flows through the village in peak hours are consistently high. Development within the Parish needs to avoid increasing local traffic. Highways England consultation on the A12 widening\(^8\) shows main junctions along The Street are unable to meet demand at peak times. The reliance on cars and the restrictive street pattern in the village creates a need for alternatives to private car use to be provided. Partnership working to ensure safety, reduce pollution from queuing cars and create free flow of traffic is required. There are no dedicated cycle routes or bridleways in the Parish. This policy aims to encourage a reduction in car use and increase the use of bus and train services which the community would like to see maintained and enhanced.

Public Rights of Way (PROW), footpaths, bridleways and quiet lanes will be protected and maintained by ECC as the highway authority. Any amendment to an existing or provision of a new PROW will be advertised, and the Parish Council will provide comments accordingly.

It is essential we make our streets safer and more welcoming. Being able to walk and cycle safely improves the quality of life and fitness of the whole community. Access for all standards will ensure people with disabilities are able to mobilise within the community. Through designing ‘shared spaces’ users will feel that, taking due care, they can move through a space freely and with confidence.

Encouraging families to walk to school through the enhancement and proper maintenance of existing walking routes and the creation of appropriate paths from any new development site will reduce some of the parking issues around the schools. The ECC’s Statement of Education Policy August 2015 states the legal definition of an available walking route is a route along which, accompanied as necessary, a child can walk with reasonable safety to school. A parent has a right to challenge the availability of such a route.

\(^8\)https://highwaysengland.citizenspace.com/he/a12-chelmsford-to-a120-widening-scheme/supporting_documents/A12%20Chelmsford%20to%20A120%20%20Options%20Assessment%20Report%20OAR.pdf
Facilities and Infrastructure Policy

**Key issues:** Commuter parking on residential streets, parking to access healthcare care facilities, and general lack of availability of parking is of concern.

The Parish does not currently have a public electric vehicle charging point.

**Objectives:**
- To retain and increase public parking areas in the village particularly in the vicinity of important community facilities
- To ensure adequate parking is provided within the site perimeter for all new developments
- To discourage on-street parking by commuters within residential development by providing adequate affordable parking for the railway station
- To maintain free flow of traffic
- To provide charging facilities for electric vehicles
- To provide for the anticipated increase use of eco-friendly vehicles

**FI2 Parking**

Development will be required to provide vehicular and cycle parking in accordance with the current adopted Essex County Council Parking Standards.

**Residential parking**
- Off street parking for each dwelling with provision for deliveries and services, guests, healthcare personnel e.g. patient transport pick up/drop off and other transient visitors.
- The use of tandem parking on properties or large parking courts to the front part of developments will be discouraged.
- Where garages are provided they must be designed to reflect the style of the house they serve and set back from the street frontage.

**General parking**
- When proposals for development and planning applications are being considered opportunities to provide public car parking near to community services will be identified.
- Any existing public parking area e.g. Railway Station, Hadfelda Square will be retained unless an equivalent or improved facility is provided nearby.
- Proposals that improve parking facilities enhancing safe and suitable access to the train station will be supported.

**Business parking**
- Business developments will be required to provide appropriate off road parking for customers, deliveries and staff.

**Electric Charging Points**
- New public car parking provision should include charging points as standard. The provision of charging points in existing public car parks will be encouraged and supported.
- New developments will show that they have made or have the potential to have provision for electric vehicle charging for each dwelling.
- New developments should include provision of a public charging point/s in communal parking areas.
Facilities and Infrastructure Policy

Justification:

BDC have adopted the Essex Parking Standards (in the process of being updated) which are considered to be acceptable for new developments within the Parish at the time of writing.

Adequate parking provision including visitor/delivery spaces within the perimeter of all new housing is considered to be an essential requirement to prevent vehicles impacting surrounding roads with overflow parking. New developments need to address the full range of vehicle movements required including: emergency services, refuse collections, delivery services.

Residents report high volume of commuter parking in residential streets. There is a desire to find solutions to this problem through planning or non planning measures. There are also parking issues around healthcare facilities. Staff and patients have reported that they frequently find it difficult to park within the vicinity of the surgery as parking was restricted nearby due to commuter parking. Parking on pavements has been reported, preventing access for people with mobility problems, visual impairments and pushchairs.

High traffic flow and demand for parking at certain times of the day has been highlighted through community engagement. The Street and Maldon Road are both narrow roads with limited parking places for shops and businesses. On street parking blockages create safety and traffic flow issues.

The rise in electric car ownership has nationally increased 2012—2015 an average of 152.66% per year\(^9\). The increase in electric vehicles gives rise to the need for charging points for hybrid or all electric vehicles.

\(^9\)NASDAQ March 2016 The rise of electric vehicles by the numbers.
Facilities and Infrastructure Policy

**Key issues:** Provision of local schools, nurseries, surgery and pharmacy in the village is important. Impact of new development will affect their ability to cope. Lifelong learning opportunities are encouraged within the Parish.

**Objectives:**
- To facilitate sustainable schooling provision which can provide places for all early years and primary age children within the Parish
- To promote education facilities for all ages
- To support and promote the provision of health care facilities in the Parish
- To encourage facilities for promotion of mental health

**FI3 Education and Health Infrastructure**

The provision of education facilities for all ages within the Parish will be encouraged in appropriate locations.

The provision of new physical and mental healthcare services within the Parish will be encouraged in appropriate locations.

Loss or degradation of education or healthcare services will be resisted.

---

**Justification:**

Sustainable schooling should provide places for all Early Years and Primary age children within the Parish. Where children have to be transported from outside the area to a local school and vice versa there is a potential impact on traffic congestion, the environment, health, safety and wellbeing. Various factors mean that a number of children come from further afield to local schools leading to children within the Parish being unable to take up places. Further development will increase the need for school places. At present ECC have said that they have no plans to expand local schools. The possible move to Academy or other similar status during the plan period may provide an opportunity for reviewing the options to increase capacity which could include development. The current sites have limited space for expansion. Lifelong learning can be delivered in many different ways and provides a useful social function promoting wellbeing and mental health. It can also assist with change of employment direction and other lifestyle changes. Provision for lifelong learning is supported.

Healthcare facilities e.g. surgery, pharmacy and dentist are of importance to residents. It is strongly desired that the current levels of service are maintained and improved. The impact of an ageing population and housing development will require management to avoid diminishing the service.

The redevelopment of existing education and health sites to increase capacity is supported. Relocation of existing provision to an alternative site in the Parish is supported provided it is in place before redevelopment of the existing site takes place.

Over the Plan period there is the potential for significant change in the provision and funding of education and healthcare facilities. This policy seeks to ensure that positive benefits from these changes are achieved for the residents of the Parish.

St Andrew’s Church of England Junior School
Facilities and Infrastructure Policy

Key issue: Concern about the loss of local assets and amenities and the benefits of retaining these for community use.

Objectives:

- To support Assets of Community Value (ACV) being identified, retained and operated by or on behalf of the community

FI4 Retention of Assets of Community Value

Proposals that will result in the loss of, or substantial harm to, an ACV will be strongly resisted.

Loss of an ACV will only be permitted when there is no longer a need for that facility or a replacement facility of equal or enhanced quality is available or can be provided as part of any scheme.

Justification:

"Under the Localism legislation, voluntary and community organisations and parish councils can nominate an asset to be included in a ‘list of assets of community value’. The local authority will then be required to maintain this list. If the owner of a listed asset then wants to sell the asset a moratorium period will be triggered during which the asset cannot be sold. This is intended to allow community groups time to develop a proposal and raise the required capital to bid for the property when it comes onto the open market at the end of that period."\(^{10}\)

There is strong community support to safeguard village assets. The Parish is fortunate to have a number of assets but only the Sportsmans Arms, in Nounsley, is currently listed as an ACV with BDC and is supported by an active local group seeking to bring it back into use to provide a community hub. The NPPF confirms that the planning system plays an important role in facilitating social interaction and the importance of planning positively for the provision and use of shared space including community facilities and services.

Other sites/buildings suitable for inclusion on the list of ACVs within the Parish will be considered by the Parish Council throughout the Plan period. The community are encouraged to nominate buildings or land that are considered important to social wellbeing as ACV’s accepting that such assets will require community support and funding if they become at risk in the future and are to be retained. The benefit of listing community assets is that it effectively stops the clock on the sale of assets to allow community groups to make a bid to purchase the asset and so preserve its social value. Such assets may be for instance the local shop, library, pub, church buildings, heritage building or open space.

\(^{10}\) Locality Quick Guide to the Community Right to Bid
Facilities and Infrastructure Policy

Key issue: Many of the issues raised by the community are important and can be resolved through the use of developer contributions, financial or direct provision.

Objective:
- To ensure that where there is support available as the result of a developer contribution, financial or in kind (Section 106 Agreement/Community Infrastructure Levy (CIL)) it is used for the greatest benefit of the Parish

F15 Developer Contribution

Any planning applications for new development within the Plan Area must demonstrate how they can contribute towards the delivery of community development. This may be via a Section 106 Agreement or through payment of any future CIL or payment contribution method.

Provision towards infrastructure, either through direct provision of new facilities or through financial contributions, will be expected from all development subject to the guidance set out in the National Planning Policy Framework including the ability for development to be delivered viably.

Any contribution secured as a result of development within the Plan Area shall be prioritised towards the delivery of targeted community objectives wherever possible. If any unilateral undertaking is proposed to directly deliver any of the Parish Council objectives, the acceptability of any scheme must first be agreed in writing by the Parish Council. Otherwise, it is intended that the Parish Council will prioritise any general financial contribution towards provision of a specific project.

Justification:

New housing development will put additional demands on services such as healthcare and education, community facilities, utilities and infrastructure. To mitigate these demands, developer contributions will be sought to ensure the Parish is a thriving sustainable community. Contributions are in proportion to the scale of development. Without large growth major infrastructure improvements may be unlikely. The Parish does not support large scale development. The requirements of the community will change over the Plan period. A list of varying scaled projects has been identified and is kept up to date and reviewed by the Parish Council which can be found on the Parish Council website. Development contributions for use by the Parish should be used to implement items from this list as prioritised by the Parish Council.

The BDC Open Spaces Action Plan (2016) sets out a list of outline proposals for the provision and enhancement of spaces within the Parish, which enables BDC to demonstrate where financial contributions from developments under their Open Spaces Supplementary Planning Document will be spent. These open spaces are enjoyed by the community who wish to see them retained and improved. The Parish Council input in the periodic review of the Open Space Action Plan.

Duck Pond
**HOUSING**

The Housing policies seek to ensure that any new housing developments are of good quality and design, add to the existing characteristics of the Parish and meet the needs of the community. Large, high density developments are regarded as detracting from the rural nature of the Parish. Some new housing provision will be required. It is critical for sustainability that infrastructure constraints, such as road congestion, limited school places and GP capacity are taken into account.

There is a higher than average level of detached homes in the Parish (44.9% compared to the English average of 22.3%) with the majority of housing being owner occupied (73% of households, English average 64%). There is a higher than average car ownership in Hatfield Peverel (85.8% of households having one car or more, English average 75.3%). The Parish has a population of 4,375 people with a bias towards the 60 plus age group (1015 individuals - 23.1% of total residents, England average 16.1%) The Residents Survey reflected the highest engagement by the 45 to 59 age group.

The community has identified that there is a need for more options for the older population to downsize into bungalows or ground floor accommodation and starter homes for the younger population of the Parish. It is recognised that the provision of affordable housing is primarily achieved through a mix of housing types on larger sites. Meeting these housing requirements within the Parish will help stem the trend of outward migration, enhance the local economy and keep facilities in use. A thriving community relies upon a mix of ages and skills to be sustainable, with exchange of experience and knowledge.

Hatfield Peverel has various Grade II Listed Buildings located along Maldon Road, The Street and in Nounsley. Remnants of the architectural styles and building materials such as timber framing with pastel coloured render, red brick and red clay roofing tiles can be seen on the older buildings within the Parish. The 1970s saw an increase in residential development in the Parish of mixed design. Nounsley has its own more rural identity. The Hatfield Peverel and Nounsley Character Assessment gives a detailed study of the built form within the Parish and supports policies within the Plan.

BCD New Local Plan process identified that the District should deliver 862 new homes per year between 2013 and 2033 to meet the objectively assessed need for new homes. Hatfield Peverel was not identified in the Braintree District Council Core Strategy 2011 as a growth area unlike the settlement of Witham, whose development to the south west brings Witham closer to Hatfield Peverel. BDC Local Plan Sub Committee agreed on 15th December 2016 to allocate a comprehensive development area in the emerging Local Plan including: the former Arla site (HATF608), Sorrells Field (HATF313) and Bury Farm (HATF630) which could provide in excess of 200 homes (see map on page 55). This will exceed the identified local needs of the Parish and contributes significantly to the needs of the District. As an emerging Local Plan this could be subject to change. During the engagement and consultation process the community has shown support for the redevelopment of the former Arla site for mixed use. The NDP policy HO6 provides detail on this site allocation.

National Policy supports development of brownfield over greenfield sites. Brownfield sites identified within the Parish are: adjacent to the Co-op Store on The Street (formerly Cowards Garage) and the former Arla site. The land adjacent to the Co-op Store had planning permission granted for 9 dwellings on 18 August 2016.

Any development on sites unallocated in BDC’s emerging Local Plan should be small scale as supported by the Residents Survey.
Map of BDC site allocations proposals Dec 2016

Housing Key Issues

**Planning**

- Concern that new developments would detract from the rural nature of the Parish. Smaller, creatively designed developments, with less impact are preferred over larger sites.
- Family members are unable to move locally due to the gap between house prices and income.
- Accessibility/inclusiveness should be actively promoted e.g. flats or apartments built in the area should have lifts to cater for those with mobility difficulties, buggies or heavy shopping.
- There is a shortage of suitable housing for the ageing population which leads to under occupancy, older residents living in unsuitable homes and the local market becoming stagnant.
- There is a need for bungalows in the Parish to support independent living for residents with a disability or for downsizing from larger family homes.
- Easy access to local amenities is important to the ageing population.
- The lack of affordable housing (see Glossary) in the Parish is resulting in younger people having to live with parents or move out of the area.
- Residents are concerned that there is trend to smaller gardens and private areas leading to increased density of building and decreased amenity.
- Residents want to continue to live in and move around the Parish safely.
- Closure of the Arla factory caused loss of employment in the village. The site gives an opportunity to provide mixed residential and commercial facilities for the Parish. As a brownfield site it is suitable for development to prevent dereliction.

**Non-Planning**

- There is a need for property to rent at affordable prices to avoid people having to move away.
- The split between rented and intermediate for the affordable housing in the Parish is set too low to take account of the apparent limited capacity to secure lending.
- There is concern that housing is being taken up by people not local to the area and residents are keen to promote a “locals first” policy.
**Housing Policy**

**Key issue:** Concern that new developments would detract from the rural nature of the Parish. Smaller, creatively designed developments, with less impact are preferred over larger sites.

**Objectives:**
- To ensure the development of new homes or extension of existing developments adds to or maintains the rural nature of the Parish
- To create safe, well designed and easily accessible places to live

**HO1 Design of New Developments**

This applies to all development whether it is a new site or an addition to an existing development.

The Hatfield Peverel and Nounsley Character Assessment along with Building for Life 12 and the Essex Design Guide should inform the design of new proposals.

New residential developments will be considered appropriate if they can demonstrate that the following have been addressed within the proposal:
- Provision of a mix of housing types for a socially inclusive community
- Density of development must have regard to that within the immediate and surrounding area. Where there may be an impact on the natural environment a lower density may be considered acceptable or a higher density where the design is both innovative and of a high standard and in a highly sustainable location
- Layout, height and overall elevation design should be in harmony with the character and appearance of the surrounding area, including views into and out of the site. Materials should reflect the development’s context
- Developments on unallocated sites should be for small numbers of houses of up to 30 houses or bungalows

- On developments of 10 or more mixed housing types at least 1 wheelchair unit will be provided per 10 dwellings. (e.g. 27 dwellings = 2 units)
- Good connection and permeability – short, safe and direct routes for pedestrians, wheelchair users, cyclists and mobility scooters connecting through the development to the rest of the village
- The changing needs and lifestyles of the population have been considered, building to Lifetime Homes Standard (see Glossary) in accordance with current national guidance
- Innovation to achieve low carbon sustainable design that meets the BREEAM Home Quality Mark Standard Excellent where viable (see Appendix 3)
- New development will be encouraged to adopt a ‘fabric first’ approach to reduce energy demand and provide energy in the most cost effective way
- The creation of shared spaces for all users, alternatives to the car and streets that encourage low speeds are encouraged
- The use of high quality surface materials are expected in order to help with marking out parking areas and shared spaces
- The provision of a well-designed landscaping scheme to soften the impact of the development, provide new wildlife habitats and enable cohesion with the existing settlements
- Careful consideration should be given to the materials used in marking boundaries on those plots bordering the public realm for visual appearance, safety and security
- Allowance for the efficient functioning of the BDC waste and recycling scheme with convenient, well screened storage space for bins and recycling
- Provision of new facilities incorporated into the scheme or through developer contribution should be available for use by the general public
- **Any residential development subsequently coming forward will**
Housing Policy

Justification:
The two main settlements within the Parish of Hatfield Peverel and Nounsley, have a distinctive character which is worthy of protection. The community is committed to both maintaining and enhancing the quality of the environment. Any new development will be expected to make a positive contribution and be of a high design quality. Developments must be places that are visually attractive, safe, functional, accessible and inclusive.

Incremental small scale growth is preferred by residents over large scale development on unallocated sites and therefore up to 30 dwellings has been selected as an appropriate level to achieve the following aims:

- New housing should be fully integrated into the built area as outlined by the Hatfield Peverel and Nounsley Character Assessment, in a sustainable location, avoiding a single large development that is perceived as a separate place.
- This will ensure that residents in the new homes feel part of the existing community with easy access to existing facilities.
- Provision for an appropriate mix of house types to meet the communities needs, including bungalows.
- It is important that any development resulting in additions and alterations to the development boundary respects and reflects the surrounding area and rural feel of the Parish. Where it is proposed to add to an existing development it is important that the same criteria are applied to ensure quality of design, permeability and connectivity. The living experience of both existing and incoming residents should be enhanced by good design and opportunities taken to provide improved amenities.
- The effects of changing needs and lifestyles can be mitigated through good initial property design ensuring adaptations are easily accommodated. Lifetime Homes and Building for Life 12 (see Appendix 3) give clear guidance to meet these requirements. Community Housing figures show there are just 12 specialist older person and 13 one bed bungalow housing association homes in the Parish. Small bungalows rarely appear for sale on the open market and are often subjected to redevelopment to two stories.
- The lack of suitable properties means that older residents or those with a disability have no option other than to stay in larger family homes or move out of the Parish.

Any mitigation, including allocation of recreational land, must also consider any adverse effects from pollution.

need to be subject to a project level Habitats Regulations Assessment (HRA) and secure sufficient mitigation measures to avoid a Likely Significant Effect, until such time as an Essex Coast Recreational Avoidance Mitigation Strategy (RAMS) is approved.”

Housing Policy

Key issue: There is a shortage of suitable housing for the ageing population which leads to under occupancy, older residents living in unsuitable homes and the local market becoming stagnant.

Objective:
- To provide housing that enables owner occupiers to downsize to smaller, easily managed properties, near to services and facilities enabling independent living

HO2  Retirement Housing

Proposals for bungalows will be supported.

Proposals for retirement housing that respects and enhances the character of the Parish will be considered appropriate providing they can meet the following criteria:
- The development must provide an appropriate landscaping scheme which incorporates acceptably designed outside communal amenity areas for occupiers of the development whilst protecting the amenity of neighbouring residents
- Accessibility – unobstructed safe footpaths to cater for mobility scooters and wheelchairs. Easy access to public transport options and communal facilities such as Doctor’s Surgery, Library and food shops
- All accommodation must be suitable for wheelchair users
- Properties should be built to Lifetime Homes Standards

Justification:

Older people need a variety of options to enable them to live full lives within the community and encourage downsizing. Well-designed houses and environment will improve their independence and accessibility to the wider community. Developments need to be in the right location: near shops, services and transport links. Limited downsizing opportunities keeps larger properties out of the market. This makes it difficult for people to meet changing requirements at different life stages. Our community wishes new developments to provide a number of bungalows allowing our ageing population to stay locally where families, social connections and familiar facilities exist. Engagement results showed a desire for 2 or 3 bed bungalows with generous living space as a practical replacement for their 3 to 5 bedroom house. Families staying together within the Parish enables them to share caring responsibilities for both young and older members, helping to preserve communities.

Home Builders Federation published data in 2012 stating by 2033 60% of new household growth will be those aged over 65. In February 2012, a YouGov poll for Shelter said that 33% of people over 55 are interested in specialist housing for older people, which equates to more than 6 million people. The population in Hatfield Peverel is an ageing one compared to the national average (Rural Community Profile 2013).

“If communities are to work for today’s and tomorrow’s older populations, planners must focus on how we can ensure that our communities are places that deliver much more than the basics.” (David Sinclair and Jessica Watson ‘Making our Communities Ready for Ageing - a call to action’ 2014).

Planning Practice Guidance states that “the need to provide housing for older people is critical given the projected increase in the number of households aged 65 and over accounts for over half of the new households (Department for Communities and Local Government Household Projections 2013). Plan makers will need to consider the size, location and quality of dwellings needed in the future for older people in order to allow them to live independently and safely in their own home for as long as possible, or to move to more suitable accommodation if they so wish. Supporting independent living can help to reduce the costs to health and social services, and providing more options for older people to move could also free up houses that are under occupied. Many older people may not want or need specialist accommodation or care and may wish to stay or move to general housing that is already suitable, such as bungalows, or homes which can be adapted to meet a change in their needs.”
**Housing Policy**

**Key issue:** The lack of affordable housing (see Glossary) in the village is resulting in younger people having to live with parents or move out of the area.

**Objective:**
- To ensure that new housing developments provide a number of affordable houses which would be available to local people reducing the number of “hidden households”

---

**HO3 Affordable Housing**

Any residential development 11 or more dwellings will be expected to provide 40% affordable homes.

Housing type should reflect that identified as being required by applicants with a local connection on the Housing Register.

In order to promote social inclusion, the affordable housing provision must be integrated within the market housing and not located on the periphery of the development.

Tenure will be on an 80/20 split of rented and intermediate housing, unless it can be demonstrated that the ratios should be adjusted to meet local demand.

First occupation of any dwelling will be specifically for people with a local connection to the Parish of Hatfield Peverel with a housing need in accordance with the prevailing Allocations Policy of the Local Authority. This requirement will form part of the Section 106 Agreement.

Local connection is defined by:
- Have lived in the Parish for 5 years of the last 8 years and/or
- Have immediate family (parents, children, siblings) that have lived in the Parish for 5 years or more
- Employed in the Parish for 5 or more years
- Must be registered on the District Housing Register

---

**Justification:**

Meeting the demands for affordable housing in the Parish will help stem the trend of outward migration, enhance the local economy and keep facilities in use. A thriving community relies upon a mix of ages and skills to be sustainable. Lack of affordable houses for residents wishing to remain in the village reduces opportunities for caring responsibilities to be shared within families. Despite the higher than average level of home ownership in the Parish concealed households (those living in a household wanting to move to their own accommodation to form a separate household), are largely unable to enter the housing market due to the gap between income and house prices.

BDC policy requires residential development of 11 or more dwellings to provide 40% affordable homes, a level which contributes to identified need while allowing viable development. Figures from StatNav show that there is a low turn over in tenancy. 34 households in Hatfield Peverel were identified as requiring housing association homes in the Parish. The number of bids that occurred on properties when they became available was an average of 133 bids for a 2 bed house during 2009 and 2014. These included those without a local connection. This strengthens the case for first occupation for people with a local connection. The 2014 BDC Strategic Housing Market Assessment (SHMA) quotes peoples’ reasons for wanting an affordable home was to be nearer family and employment. BDC SHMA states 65% of those requiring Affordable Housing wished to rent from a Registered Provider (RP) and 35% desired shared ownership through RP intermediate housing.

The RCCE Housing Needs Survey in March 2015 identified there was a housing need within the community. The ability to secure a property on the open market in the Parish was limited due to affordability. A suitable split for affordable housing in the Parish should be set at a higher rate to the District. 80:20 split between rented and intermediate takes account of the apparent limited capacity to secure lending.
Housing Policy

**Key issue:** Residents are concerned that there is a trend to smaller gardens and private areas leading to increased density of building and decreased amenity.

**Objective:**
- To prevent over development of an area affecting the environment of the village and the wellbeing of the residents

**HO4 Minimum Garden Sizes**

Houses when built will have a minimum private garden size of 100m².

Exceptions to this requirement will be:
- One and two bedroom dwellings – a minimum private garden area of 50m² will be required
- Three bed terrace dwellings – private gardens shall be a minimum depth of 2.5m x the width of the house (except where the provision exceeds the 100m²) to a minimum private garden size of 100m²
- For flats and apartments - minimum balcony area of 5m² where appropriate with a similar size private area for the ground floor dwelling and a private communal area for all which shall be to a high specification design, hard and soft landscaped garden area of 25m² per flat or apartment

**Justification:**

The village is valued for its rural setting. Historically many of the properties have had large gardens which contribute to the feeling of openness. Not everyone wants a large garden but high density build with small amenity spaces gives rise to a cramped and closed environment. Gardens are important for many reasons especially for health and mental well-being: access to fresh air, a safe place for families to play, a place for tranquillity and relaxation, exercise, gardening and growing food, wildlife habitats, education and outside living space.

The Essex Design Guide has recommended minimum garden sizes of 100m² as a requirement for most new housing types since 1973. This size has been found to provide an acceptable and workable minimum standard to accommodate most household activities and offer an area associated with the property for private relaxation space. BDC relies on the Essex Design Guide to inform its policies on minimum garden sizes, however within the guide is also a reference to private amenity space which allows for a smaller area to be provided for new dwellings. This reduced provision has recently led to the approval of a housing scheme with less than desirable amenity area which the community have voiced they do not wish to see repeated in the village.

Local garden pond

Local vegetable garden
**Housing Policy**

**Key issue:** Residents want to continue to live in and move around the Parish safely.

**Objective:**
- To ensure that the design of new residential developments provides safe places for people to live within and visit

**HO5 Creating Safe Communities**

Developments will provide safe play spaces and design out crime.

Children’s play space must be located centrally within a development, where good passive surveillance from surrounding properties is achieved whilst having regard to the residential amenity of properties close by.

Secured by Design methods will be incorporated into any new residential development to design out crime and create a feeling of a safe place to live and move through.

---

**Justification:**

It is good sense and good planning that opportunities to remove the risk of crime are incorporated into any new development. 'Designing out Crime' looks at the relationship between private space and public space, environmental design and physical security. Any measures that reduce the vulnerability of people and property should be incorporated into new developments to improve people's quality of life.

The NPPF paragraph 58 states that Neighbourhood Plans should “create safe and accessible environments where crime and disorder, and the fear of crime, do not undermine quality of life or community cohesion”

If communities feel safe with facilities and services within easy access by foot or cycle then more people will be encouraged not to use their vehicles for short journeys.

Secured by Design is “the official UK Police Flagship initiative which combines the principles of designing out crime with physical security” Secured by Design Website 2016.
Housing Policy

Key issue: Closure of the Arla factory caused loss of employment in the village. The site gives an opportunity to provide mixed residential and commercial facilities for the Parish. As a brownfield site it is suitable for development to prevent dereliction.

Objectives:

- To ensure that maximum benefit to the Parish is derived from redevelopment of the site
- To ensure the use of brownfield sites in preference to greenfield sites to provide for the needs of the Parish
- To ensure the development of the site provides for mixed use including residential and commercial
- To ensure the right mix of housing on the site, including bungalows
- To ensure the use of brownfield sites to provide for the Parish requirements in preference to greenfield sites.

HO6 Allocation of the former Arla site

The redevelopment of the former Arla site (HATF608) (see map page 55) will be supported provided that it includes:

- Affordable housing
- Bungalows
- Retirement housing
- Apartments/starter homes
- Small business units e.g. workshops, offices, gym facilities, nursery
- Work hub/Café/tea room
- Safer access onto Station Road
- Contributions towards highways enhancements on Bury Lane including safer access from the A12 slip road, to be agreed with the relevant Highways Authorities
- Contributions towards enhanced pedestrian and cycle access on Station Road and Bury Lane, linking up to The Street
- Contributions to improved access to and from The Street via Bury Lane
- Provide improvements to the unsafe access onto Station Road from the station car park
- Mitigates adverse noise and air pollution from the A12 and railway

1) A satisfactory assessment of potential contamination of the site and remedial action plan.
2) If the development is not capable of providing adequate green infrastructure to mitigate against significant effect on local SPA/Ramsar sites it must provide a package of mitigation measures as follows:
   a) Promoting the local footpath network by supplying all new residents with a map and guide to local (circular) walking routes.
   b) A proportionate financial contribution towards improvements to the Public Rights of Way network within the vicinity of Hatfield Peverel and subject to agreement with the Rights of Way Team at Essex County Council.
   c) A proportionate financial contribution towards visitor monitoring surveys on the Blackwater Estuary (to be undertaken by Colchester Borough Council) as required by Braintree District Core Strategy (2011). This is necessary to raise awareness of visitor disturbance to the Natura 2000 sites.

Justification:

BCD has carried out a site appraisal including SEA/SA of the former Arla site. It was the preferred option in engagement as the only available brownfield site within the existing development boundary in the Parish. The development of greenfield land outside the present development boundary is not supported. The Parish supports redevelopment in order that maximum benefit is achieved from a well-designed, sustainable mixed use site, providing social and economic development. The redevelopment would have a positive environmental impact and improve the landscape amenity.
proximity to the station and key facilities are valued. The site provides for more than the Parish’s identified local housing need identified in the RCCE Housing Needs Survey (2015).

The benefits of redevelopment will be:
- Improvements to the appearance of the village approaching from Terling or when viewed from the train
- Stopping the site becoming derelict
- Local economic development to allow shorter journeys to work for locally employed staff and mitigate the loss following Arla dairy closure
- Provision of a mix of housing types including bungalows to allow downsizing, starter homes and those coping with disabilities to move within the village close to support network

A summary of the evidence in relation to this site can be seen in the accompanying Hatfield Peverel Site Assessment (2017)
Appendix 1:  
Other Facilities and organisations in Hatfield Peverel

The Strutt Memorial Ground (known as the Rec) is a large green open space in the centre of the village beside the Village Hall. It provides a green area for recreation and is also used for large events like Party in the Park. The Rec has play equipment purchased with grants obtained by HPPC. It has the potential for further leisure and recreational development.

The Keith Bigden Memorial Ground is situated further from the centre of the village, and provides an area for the Football and Bowls Clubs to meet. The disadvantage is that the access to the ground is along an unlit footpath beside Maldon Road and a country lane. The area has the potential for further leisure and sports use.

Nounsley Play Area has play equipment purchased with grants obtained by HPPC. This area also has the potential for further leisure and recreational development.

The Hatfield Peverel Review provides information on events and is circulated to every home in the Parish bi-monthly.

The Village Hall was provided by and for the community on a self-help basis in the 1980s and is used for the benefit of the community as a whole. There is a large main hall with a stage, built with a high roof for sports use, several smaller meeting rooms and a lounge bar (open 7-11pm). The facility is now beginning to suffer from lack of support both financially and from community involvement. This amenity has potential for greater use.

There are two churches: St Andrews (C of E) and Methodist Church which have services and groups of their own for various ages. They often hold coffee mornings.

Uniformed Organisations including Beavers, Cubs, Scouts and Explorers for boys and girls, and Rainbows, Brownies and Guides are well represented in the Parish and meet at their HQ in Church Road. There is also a branch of the British Legion.

The Library puts on various events but is now only open 4 half days per week. Book and Knitting groups use the facility.

WEA (Worker’s Educational Association) has had a long time presence in the village providing regular courses, day time and evening on a wide variety of subjects.

Helen Rollason Centre provides support to those with cancer.

A map of Hatfield Peverel Amenities can be found on page 44.
Appendix 2:  
Non Statutory Planning Community Action Plan (NSPCAP)

This section provides an Action Plan arising from the non-planning issues identified during the engagement phase of preparing the HPNDP that residents consider should be addressed to improve the quality of life and wellbeing in the Parish. Taken together with the policies of the Plan, the Action Plan will inform residents and other stakeholders on how the community seeks to move forward.

This Action Plan does not form part of the development and land use policies in the Plan and is not subject to the examination process or referendum.

The Action Plan sets out how delivery of these projects is envisaged, the stakeholders considered necessary to achieve the desired result, and how any required funding if identified will be secured.

The Action Plan sets out projects in four categories:

1. Business and Services Projects (Economic)
2. Countryside & Environmental Projects
3. Community Wellbeing Projects (Infrastructure)
4. Road & Transport Projects

Consider providing an electric vehicle charging point in the village | Investigate and record car parking abuse | |         |
Appendix 3: Glossary

**Affordable Housing** - Social rented, affordable rented and intermediate housing, provided to eligible households whose needs are not met by the market. Eligibility is determined with regard to local incomes and local house prices. Affordable housing should include provisions to remain at an affordable price for future eligible households or for the subsidy to be recycled for alternative affordable housing provision. Social rented housing is owned by local authorities and private registered providers (as defined in section 80 of the Housing and Regeneration Act 2008), e.g. housing associations, for which guideline target rents are determined through the national rent regime. It may also be owned by other persons and provided under equivalent rental arrangements to the above, as agreed with the local authority or with the Homes and Communities Agency. Affordable Rent is subject to rent controls that require a rent of no more than 80% of the local market rent (including service charges, where applicable). Intermediate housing is homes for sale and rent provided at a cost above social rent, but below market levels subject to the criteria in the Affordable Housing definition above. These can include shared equity (shared ownership and equity loans), other low cost homes for sale and intermediate rent, but not affordable rented housing. Homes that do not meet the above definition of affordable housing, such as “low cost market” housing, may not be considered as affordable housing for planning.

**Amenity** - An element that contributes positively to the overall character or enjoyment of an area.

**Biodiversity** - Degree of variation of life forms within a particular ecosystem. Biodiversity is a measure of the health of an ecosystem. Human activity generally tends to reduce biodiversity so special measures often need to be taken to offset the impact of development on natural habitats.

**Braintree District Council** - The Local Planning Authority for Hatfield Peverel.

**BREEAM Home Quality Mark** - Building Research Establishment Environmental Assessment Method Home Quality Mark is a rigorous and relevant standard for new homes, using a simple 5-star rating to provide impartial information from independent experts on a new home’s design and construction quality and running costs. It will also show the impact of the home on the occupant’s health and wellbeing, as buildings become more airtight, respiratory conditions rise and our population gets older. It will demonstrate the home’s environmental footprint and its resilience to flooding and overheating in a changing climate. In addition, the Mark will evaluate the digital connectivity and performance of the home as the speed, reliability and connectivity of new technology becomes ever more critical. The Home Quality Mark will enable housing developers to showcase the quality of their new homes, and identify them as having the added benefits of being likely to need less maintenance, cheaper to run, better located, and more able to cope with the demands of a changing climate.

**Brownfield** - Previously developed land.

**Building for Life 12** - A technique for assessing the quality of housing proposals using 20 criteria including sustainability, urban design and social/community factors.

**Coalescence** - The merging or coming together of separate towns or villages to form a single entity.

**Community Facilities** - Facilities providing for the health, welfare, social, educational, spiritual, leisure and cultural needs of the community.

**Community Infrastructure Levy (CIL)** - Allows Local Authorities to raise funds from developers undertaking new building projects in an area. Money can be used to fund a wide range of infrastructure such as transport schemes, schools and leisure facilities.

**Core Strategy** - A development plan document forming part of the Braintree District Council Local Plan which sets out a vision and core policies for the development of the District.
Design out Crime - A resource created to help professionals understand more about how design can be used to combat crime. http://www.designcouncil.org.uk/resources/guide/designing-out-crime-designersguide

Development - Defined under the 1990 Town and Country Planning Act as the carrying out of building, engineering, mining or other operations in, on, over or under land, or the making of any material change in the use of any building or other land. Most forms of development require planning permission.

Development Plan - A document setting out the policies and proposals for the development and use of land in the area.

Evidence Base - The researched, documented, analysed and verified evidence for preparing the Neighbourhood Plan.

Examination - An independent review of the Neighbourhood Plan carried out in public by an independent examiner.

Fabric First - A building’s fabric is intended to be the longest standing part of the construction, so the adoption of a fabric first approach is designed to ensure long–term performance that will help reduce energy demand to the lowest possible level, and provide energy in the most cost–effective way.

Green Corridors - Green spaces that provide avenues for wildlife movement, often along streams, rivers, hedgerows or other natural features. Green corridors connect green spaces together.

Green Wedge - These comprise the open areas around and between parts of settlement which maintain the distinction between the countryside and built up areas, prevent the coalescence (merging) of adjacent places and can also provide recreational opportunities.

Infrastructure - basic services necessary for development to take place e.g. roads, electricity, water, education and health facilities.

Intermediate Housing - See definition under Affordable Housing.

Lifetime Homes - The Lifetime Homes standard is a set of 16 design criteria that provide a model for building accessible and adaptable homes. Each design feature adds to the comfort and convenience of the home and supports the changing needs of individuals and families at different stages of their lives.

Local Green Spaces - Local Green Space designation will not be appropriate for most green areas or open space. The designation should only be used:

● where the green space is in reasonably close proximity to the community it serves;

● where the green area is demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquility or richness of its wildlife; and

● where the green area concerned is local in character and is not an extensive tract of land.

Local Plan - A collection of documents prepared by Braintree District Council for the use and development of land and changes to the transport system. Can contain documents such as development plans and statements of community involvement.

Market Housing - Properties for sale or rent where prices are set in the open market.

Public Realm - space that is free and open to everyone, publicly accessible, including streets, squares, forecourts, parks and open spaces.

Service Village - The larger villages in the District (over 3000 population) which act as local centres for the smaller villages and rural areas around. There are 5 proposed Service Villages in the Braintree District. Previously known as key service villages.

Shared Space - A street or place designed to improve pedestrian movement and comfort by reducing the dominance of motor vehicles and enabling all users to share the space rather than follow the clearly defined rules implied by more conventional designs.

Hatfield Peverel and Nounsley Character Assessment (2016)
Acknowledgements

The HPNDP has been formulated and produced by a group of volunteers who have a wide range of skills and backgrounds on behalf of the whole community of Hatfield Peverel and Nounsley with the support of the Parish Council.

Both the Parish Council and the HPNDP group would like to thank the community for their help and support throughout the process by actively taking part in the various engagement events, workshops, meetings, competitions, surveys, photos, holding NDP post boxes, and for the use of office and meeting room facilities at the Village Hall, Crix and the Library.

Thanks are also due to the following for their professional support:

Dean Fisk Corporate Systems Manager, Braintree District Council
Sarah Long The Landscape Partnership
Paul Mason Associates Estate Agent
Alan Massow Senior Policy Planner, Braintree District Council
Ann Skippers Consultant
Jan Stobart and team Rural Community Council of Essex
Clare Wright Locality Consultant

Members of the HPNDP group which include the Steering Group, Topic Groups and Plan Writing Team who gave up their time to develop the Plan, gather supporting evidence and provide photos included:

Graham Bushby Cheryl Johnson
Serena Cameron Chris and Pam Johnson
John Cockell Lesley Moxhay
Kevin Dale Cllr Ted Munt (Vice Chairman)
Katherine Devlin Sean Osborne
Peter Devlin Helen Peter
Yvonne Dunn Louise Poulton
Ken and Jackie Earney Cllr. Les Priestley (Chairman)
